Our wine cabinets

The five basic criteria

The five basic criteria

#1

A constant temperature

In a natural cellar...

The thick walls made of stone and earth ensure a constant temperature of 10 - 14°C.

EuroCave's solution...

The walls (6 cm thick cellular insulant) and the Twin Process thermal regulation system guarantee a constant temperature of 10 - 14°C.

The five basic criteria

2

Suitable humidity levels

In a natural cellar...

The rough stone walls and ceilings capture humidity in the air, guaranteeing an ideal humidity level of above 50%. Excess humidity is controlled and evacuated via the gravel floor.

EuroCave's solution...

The exclusive humidity preservation system combined with the aluminium walls guarantee an ideal humidity level of above 50%.

3

thermal insulation, U.V. protection

In a natural cellar...

The thick walls provide excellent thermal insulation. The darkness of the cellar protects the wine from harmful U.V. rays, in this way preventing premature deterioration of your wine.

EuroCave's solution...

The walls constitute an optimal thermal barrier. What's more, EuroCave cabinets protect the wine from light thanks to their solid doors or U.V.-screened glass doors.

4

An anti-vibration system

In a natural cellar...

The thickness of the walls and the location of the cellar constitute an excellent defence against external vibration.

EuroCave's solution...

The original VES (Vibration Exclusion System) is designed to absorb vibrations which disturb wine's maturing process.

5

A permanent ventilation system

In a natural cellar...

Constant circulation of air is obtained by the difference in pressure between a door held ajar and an air vent.

EuroCave's solution...

A constant, slow flow of filtered air is obtained by the difference in pressure between two holes in the cabinet.

Choose your cabinet according to your requirements

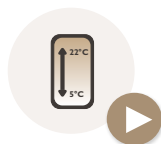

1 *Type of use*

Maturing cabinets
(single temperature) for
maturing wine.

**Multi-function
cabinets**
(2 or 3 temperature) for

Interior layout

Sort

Sliding shelves facilitate individual access to bottles and allow you to display, on one row, 7 – 12 bottles depending on the model.

Store

Always fixed, these storage shelves are designed to store a maximum amount of bottles, whilst ensuring their complete stability.

Display

Designed to vertically display bottles, these display shelves allow you to offer “wine by the glass”.

Taste

Designed to display bottles upright, these display shelves allow you to serve “wine by the glass”.

See all the layout possibilities page 50

5

Colour or covering

According to the range selected, EuroCave offers a wide range of colours and coverings (Leather or Stainless steel) to allow your cabinet to fit in perfectly in your living area or garage.

Standard colours

Collection Range Colours

Stainless steel cladding

Leather cladding

Royale panels

6

Premium optional extras*

Add a strip of light all around your cabinet, to bathe your bottles in an amber halo (U.V.-free light).

Choose the front of your shelf: Light oak or Glossy black.

Opt for sliding shelves fitted with a soft-close device, to allow the shelves to close slowly and silently.

*Equipment as standard for the Revelation range, optional extras only available for the Pure range

Tête à Tête

Première

Simply expert

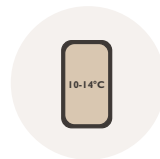

A range of wine maturing cabinets with a wide choice of modern, stylish finishes.

Its secret is a skilful combination of tradition and modernity...

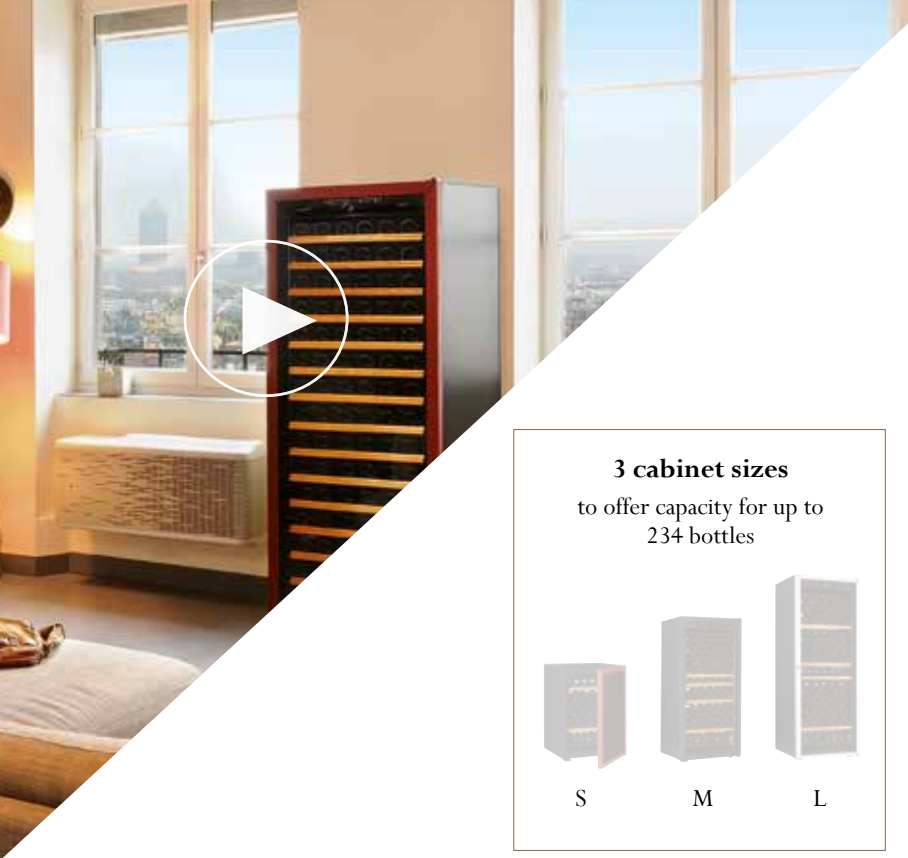

Tradition, because cabinets in the Première range observe the essential criteria for optimal wine maturing, recreating a protective environment. Modernity, because these cabinets successfully combine aesthetics and technology.

One function

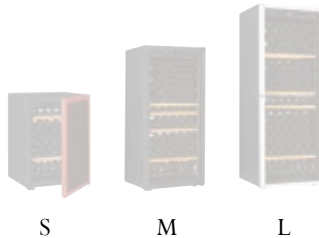

Wine maturing cabinets
recreate the same conditions
found in a natural cellar, by
meeting the criteria essential
for storing wine.

Première

Pure

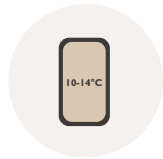

Allow your wine to mature in optimal conditions

Maturing, serving and multi-function (maturing and serving) wine cabinets, the Pure range respects the environment.

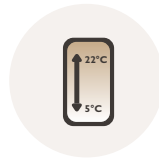

It has elegant finishes to allow it to complement all living areas.

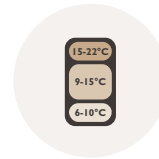

Three functions

Wine maturing cabinets recreate the same conditions found in a natural cellar, by meeting the criteria essential for storing wine.

Wine serving cabinets offer up to ten temperature zones (temperature graduated from 5 - 22°C), and allow you to store, in one same cabinet, several types of wine (rosé, white, red), at an ideal serving temperature.

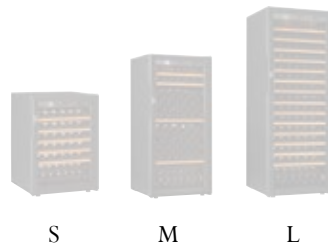

Multi-function cabinets with 3 temperatures they have three separate temperature zones: 1 zone for maturing wine (9-15°C), 1 chilling zone at the bottom (6-10°C) and 1 zone at the top for bringing wine to room temperature (15-22°C).

Inspiration

High standards for storing and serving wine

Clean lines, ergonomic curves...
Inspiration's design was devised to be
timeless, perfectly complement your
kitchen and provide unprecedented ease
of use.

Four functions

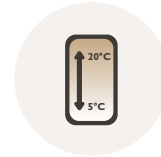

Single-temperature Wine maturing cabinet

Inspiration is set at 12°C and recreates the same conditions found in a natural cellar, by meeting the criteria essential for storing wine.

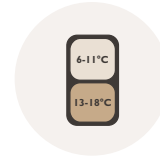

Single-temperature Wine-serving cabinet

Inspiration can be set to one temperature chosen between 5 and 20°, allowing you to have all of your bottles at an ideal serving temperature, according to the type of wine and selected temperature setting.

Multi-temperature wine serving cabinet

Inspiration offers up to 10 temperature zones (staggered from 5 - 20°C) allowing you to store several types of wine (rosé, white, red) at an ideal serving temperature within one same cabinet.

2-temperature cabinet for serving wine and preserving one open bottle

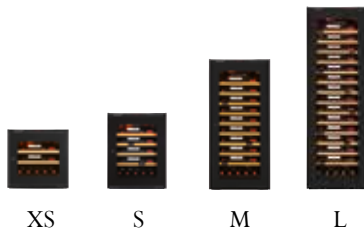

Inspiration has 2 temperature zones: 1 zone for bringing red wine to room temperature at the bottom (13 - 18°C) and a chilling zone at the top (6 - 11°C). This model offers an air vacuum system to allow you to store an open bottle for up to 10 days.*

* Stores one open bottle for up to 10 days, depending on the wine and its vintage. Only available for 2-temperature models.

Inspiration

Time for understated
design

Technical elements are concealed... The air vent is invisible, handles have now disappeared, replaced by a discreet hand grip.

Flush-fitted or built-in

All of the cabinets in the Inspiration range can be both built-in and flush-fitted. If flush-fitting, the wine cabinet is placed between two kitchen units, usually under a work top. If the wine cabinet is going to be built-in, it is simply slid into the housing of the kitchen cabinet.

Serving shelf

It allows you to store bottles upright.

Noise level dB(A): 38

**with a maximum humidity level of 50 %

Our cellar layouts

Cellar conditioners and storage systems

Cellar conditioners and storage systems

Modulo | cube

Easily create a wine storage area with beech folding racks.

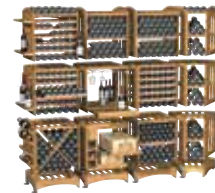

Modulo | rack

Store your bottles directly in their cases.

Modulo | steel

Assemble steel modules in infinite ways and give your cellar a contemporary feel.

Modulo | thèque

Create a customised piece of furniture in solid oak that adapts to the lines of your natural cellar.

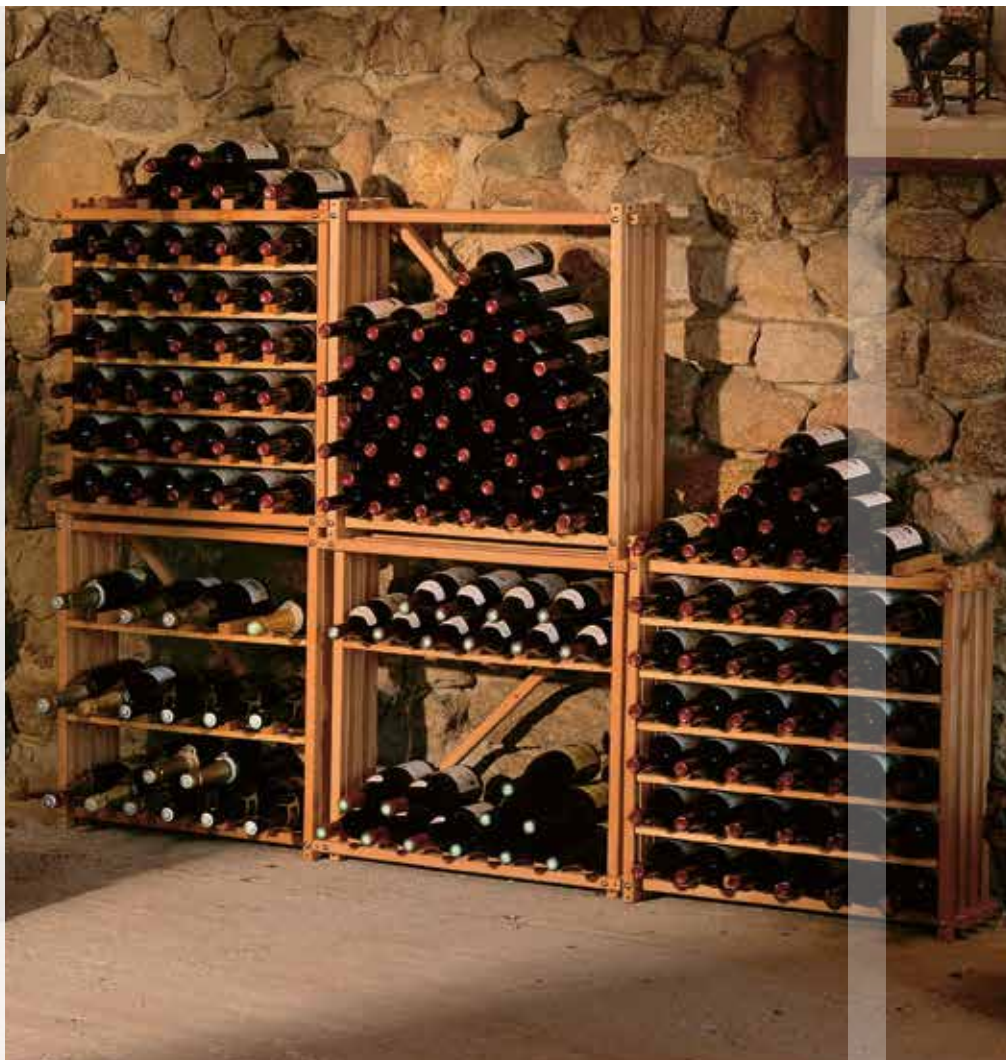

Inoa

Condition and thereby transform any room into a wine cellar.

Modulo | cube

A simple, adaptable storage system

Modulo|cube is a solid beech folding rack, supplied ready to assemble, which allows you to very easily store your bottles.

Modulo | cube, *Simple and adaptable*

Optimal bottle storage

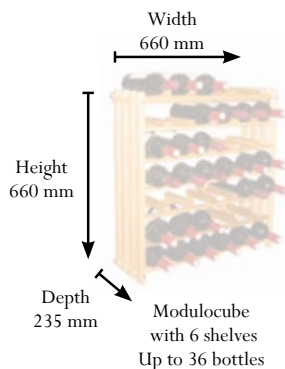

Designed in solid beech to ensure maximum strength, Modulocube allows you to effectively create an area dedicated to wine.

It is specially designed to store all types of bottles (Bordeaux, Burgundy, Champagne...).

Two options are available: store your bottles all together, or store them individually by adding up to 6 rows of shelves.

Modulocube
in storage version
Up to 50 bottles

Modulocube
with 6 shelves
Up to 36 bottles

A modular system

From one module of this functional system, you can build the storage space you need. Each module of Modulocube allows you to store, in one single depth, all types of bottles (up to 50 Bordeaux bottles).

Completely modular, Modulocube allows you to increase your storage capacity by assembling up to three heights* of modules and change layouts according to your requirements, whilst guaranteeing maximum stability.

Up to 146 bottles

Up to 199 bottles

Up to 367 bottles

*If assembling modules higher than the 2nd level, modules must be fastened to the wall.

Storage capacity

Assembling a Modulocube

An attractive price

Modulocube ensures ideal wine storage at an attractive price.

Modulo | rack

**The best solution for
storing wine cases**

Stores your bottles directly in their
cases.

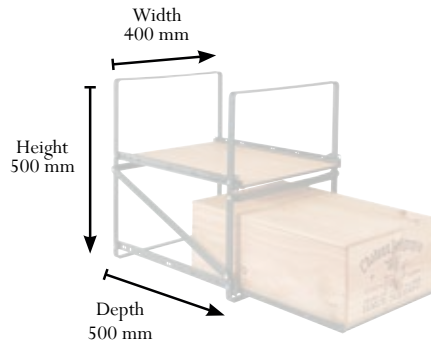

Modulo | rack, A sliding shelf system

Easy access to your bottles

Based on the principle of sliding shelves used in wine cabinets,

Modulorack is fitted with a sliding shelf system* for storing wine cases, in this way making it easier for you to access your bottles.

*Supplied without the wooden cases

Clever modular storage

- Modulorack is designed to withstand the weight of two twelve bottle cases.
- Several Moduloracks can be assembled to increase storage capacity.

Fastened to the ground, they form a strong, practical storage system. In this way, you can create an effective and stylish area for storing bottles in their original cases.

Modulo | steel

**The contemporary
storage system that
can be customised in
endless ways!**

Easy to fit modules, which can be fastened to each other in endless ways. A new product with clean, modern lines for a decidedly contemporary style.

Modulo | steel, Contemporary and customisable

An adaptable modular design

Customisable, Modulosteel can be assembled in endless ways thanks to its modules which are attached to each other side by side.

Available in 2 widths for greater modulo options!

Single depth storage

Material: Black painted steel

Epoxy coated to protect it from moisture

Modulo | steel

Modulo | thèque

Luxury storage for your finest wines

Its concept, original and innovative, is based on the assembly of different modules, to create YOUR own personal storage system.

Adaptable, Modulothèque can be added to as the number of your bottles increases.

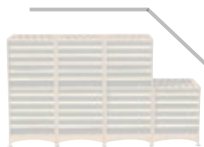

Modulo | thèque, *Luxurious and adaptable*

An almost tailor-made product

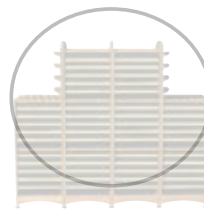

Thanks to a choice of 15 modules, Modulothèque adapts to the requirements of the room to be fitted out (sloping roof, corner of a room, vaulted ceiling...)

Easy to assemble, the modules can be dismantled if you want to move them or change the layout of your Modulothèque.

The width, height and storage capacity vary according to the number of modules installed and shelves chosen: the layout possibilities for Modulothèque are endless!

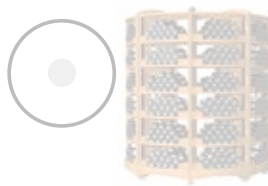

Low ceiling
H1,336 x W2,426 x D584 mm

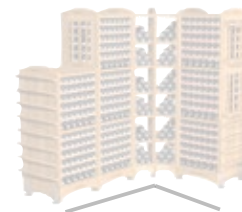

Vaulted ceiling
H2,008 x W2,426 x D584 mm

Sloping roof
H2,008 x W1,842 x D584 mm

Around a pillar
Ø1,800 mm H2,060 mm

Corner of a room
1st section of wall: L2,215.7 mm
2nd section of wall: H2,008 x W1,631.7 mm x D584 mm

Technical features

1 Pedestal module (MV2/MV17)

Thanks to its 4 adjustable feet¹, it offers excellent stability on any floor surface. Also available in pedestal corner module version.

MV2: H162 x W584 x D584 mm – 6.50 kg
Available in 40 cm width.

MV17: H162 x W584 x D698 mm – 4.20 kg

2 Basic module (MV1/MV16)

Store up to 99 bottles² in one same module. The basic module can be fitted with shelves of your choice. Optimise your space by storing 44 bottles² in the corner basic module version.

MV1: H587 x W584 x D584 mm – 11.60 kg
Available in 40 cm width.

MV16: H587 x W584 x D698 mm – 13.50 kg

3 Bar module (MV6)

The bar module³ is fitted with a sliding shelf and glass holder. It is the perfect module to ensure drinking your wine is an enjoyable experience.

H70 x W540 x D540 mm – 11.30 kg

4 Cross module (MV18)

This cross-shaped module³ option attractively and practically stores up to 72 bottles².

4.40 kg

5 Rack module (MV8)

The rack module³ allows you to easily access bottles stored in their original cases (cases not supplied), thanks to the sliding shelf system. Also equipped with a drawer to store various items and 3 Magnum bottle holders.

Total capacity: 24 bottles + 3 magnums on the side

H582 x W543 x D543 mm – 20.20 kg

1- Pedestal module supplied with 2 feet. Two extra feet (MV9) must be added for the latest module. 2- Traditional Bordeaux bottles. 3- Module fits into the basic module.

6 Superior finishes (MV3)

Safely store up to 27 bottles on top of your storage system.

H85 x D20 mm – 0.90 kg

7 Shelf module (MV7)

This module vertically displays your bottles.

H20 x W550 x D120 mm – 1.78 kg

8 Vertical bottle holder shelf (MV4)

Safely and easily handle 4 open bottles.

H20 x W550 x D120 mm – 1.30 kg

9 Swinging bottle holder (MV211)

This wire bottle holder allows you to vertically display your bottles.

H270 x W85 x D105 mm – 0.24 kg

10 Horizontal bottle holder (MV5)

This module, which gives direct access to your bottles, allows you to store 4 magnums or 8 bottles lying flat.

H640 x W122.7 x D584 mm – 7.20 kg

11 The shelves

Fit your Modulothèque with storage or sliding shelves in an oak finish.

Inoa

The principle of EuroCave cellar conditioners is to transform any type of room (garage, store room...) into a real wine cellar. Control of temperatures, maintaining humidity, air circulation... EuroCave cellar conditioners recreate the conditions essential for storing wine and make your everyday life easier.

Inoa, The cellar conditioner

Attractive and practical

EuroCave conditioners are single-piece and therefore easy to fit: they contain the evaporator and condenser in one same unit. In this way, they require no gas charging or welding. All you need is a wall socket!

Designed to be aesthetically pleasing, Inoa conditioners are fitted with a very discreet front cover in galvanised steel, to be positioned, according to your preference, inside or outside your cellar.

Remote control

Radio remote control
(wired sensor supplied for
installation of the remote control
outside the cellar)

Automatic operation

As is the case for wine cabinets, EuroCave's cellar conditioner is fitted with a refrigerating unit: an evaporator forces cold air inside the room and a condenser expels warm out outside. Given the volume to be conditioned, the evaporator and condenser are ventilated. The fan of the evaporator operates continuously to ensure constant mixing of the air and optimal uniformity of temperatures, according to the speeds adjusted automatically according to requirements.

Insulation recommended to ensure optimal performance

EuroCave cellar conditioners are designed to store your wine in optimal temperature conditions, whilst guaranteeing minimum power consumption. Since traditional building materials are very poor insulators, it is essential, in most cases, to insulate the room to be conditioned. In this way, the power consumption of your appliance remains low and the insulation allows optimal performance of your conditioner.

**A thermal assessment is required before any installation.
Not insulating increases threefold the power required
to condition your room.**

EuroCave Service +

Contact your dealer for a free thermal assessment of your cellar!

EuroCave patented technology for multiple advantages

Natural humidity levels retained: this unique technology is based on an evaporation temperature of above 0°C and automatic adjustment of fan speeds. In this way, the relative humidity level is above 50% and the air in the cellar does not dry out.

Uniformity of temperature is guaranteed regardless of the temperature outside the room. Equipped with a heating function, in addition to conditioning, Inoa conditioners automatically adapt their temperature if the room varies by half a degree in relation to the set temperature.

The quietest conditioner on the market. Respects the environment.
